---

Gary,

I required each generator to provide me with a copy of the manifest/shipping documentation reflecting either shipment to disposal facility or return to the generator. I have a prescheduled meeting with Gary Porter (EPA) at the end of this month and will submit all shipping/disposal documentation that was removed from the site to him. I have tried to make copies, the resulting legibility is very poor and I will not make corrections to any shipping/disposal documentation. Therefore, once Gary completes his review of the original shipping/disposal documentation I will provide it to you for your review.

I do not have an updated inventory of the waste located at the site at this time because on the recent and on going corrective/remedial actions; however, will have a waste accountability/summary ready mid next week.

Subject: CES Inventory

Mickey:

Do you have an updated inventory for CES?

Also, I did not see any notes on the drum inventory that indicated which drums were returned to their owners. If you have that, I would like to get that.

On another note, I was reviewing the analytical data and noticed that I could not exactly tell what tanks were composited. I did not want to make assumptions. Could you please provide a cross reference to the analytical. The COC helped a little but I would still have to make assumptions. I will provide the data as an attachment.

Also, I noticed that the following files that you sent to me appear to be duplicates (Lab Aug 24, 2012.pdf and 12081165\_1.pdf). Could you confirm?

Thanks

**Gary Moore**
